

## PANASONIC SIP BASE DECT MULTI-CELL TELEPHONY SYSTEMS

PANASONIC MULTI-CELL SIP BASED DECT SYSTEMS OFFER HIGH-QUALITY BUSINESS COMMUNICATIONS, WITH SIMPLE INSTALLATION, CONFIGURATION AND MAINTENANCE

The new Panasonic range features three new fully featured DECT handsets, plus a new 4 channel High-Definition Voice DECT cell station. All handset models include a full duplex hands free mode and headset support, giving the user plenty of options for keeping both hands free while staying in touch. Phonebook entries for the handsets can be edited using a simple PC interface, with changes and updates sent 'over the air'. With 5 numbers stored per contact you can be sure that it's easy to keep all your contact details up to date and organized.

This range is platform independent and can work with any SIP compliant service, enabling high quality wireless communications in any business. Networks of up to 128 cell stations and 255 handsets can be created.
